Debbie Gochenaur teaches mathematics courses for preservice elementary teachers and also developmental mathematics at Shippensburg University. She has taught mathematics at the high school level for several years, and is currently teaching methods courses for secondary mathematics education students. She has also supervised mathematics student teachers at both the middle and high school levels. Debbie's interests lie in mathematics learning disabilities and encouraging underrepresented minorities to pursue careers in STEM. Along those lines, this spring will be her ninth year of coordinating a workshop at the *Pathways to Your Future* event at Penn State York, an outreach to middle school girls, encouraging them towards careers in STEM. She is also a member of the National Committee on Minority Participation in Mathematics with the Mathematics Association of America, and a member of the Math Advisory Board for Heinemann Publishers. She is a frequent presenter at local, statewide, and national mathematics and mathematics education conferences. She received her B.S. in mathematics from Pennsylvania State University, a M.S. in mathematics from Shippensburg University, and her Ph.D. in mathematics education from American University. Debbie may be reached at dlgochenaur@ship.edu.
